SCHIEBEL RECEIVES MAJOR MINE DETECTOR ORDER FROM NATO

Vienna, 12 July 2017 – Under a contract with the NATO Support and Procurement Agency (NSPA), the Austrian manufacturer Schiebel will deliver 700 units of the AN-19/2 Mine Detecting Set, one of the world's most widely used mine detectors for both humanitarian and military purposes.

The AN-19/2 Mine Detecting Set, suitable for fast, accurate demining in all climates and terrains, has served as the standard detector for numerous armies, including most NATO countries.

Due to its modular design it provides maximum flexibility to the user as well as ease of maintenance, some of the reasons that explain the product's ongoing popularity over decades.

About Schiebel:

Founded in 1951, the Vienna-based Schiebel Group focuses on the development, testing and production of state-of-the-art mine detection equipment and the revolutionary CAMCOPTER[®] S-100 Unmanned Air System (UAS). Schiebel has built an international reputation for producing quality defense and humanitarian products, which are backed by exceptional after-sales service and support. Since 2010, Schiebel's composite division supplies high-tech customers with products of supreme carbon fiber technology – all quality-controlled to meet ISO 9001 standards. With headquarters in Vienna (Austria), Schiebel now maintains production facilities in Wiener Neustadt (Austria) and Abu Dhabi (UAE), as well as offices in Washington DC (USA) and Phnom Penh (Cambodia).
