## SCHIEBEL OPENS FACILITY IN FRANCE

**Vienna, 20 June 2024 – The Schiebel Group is strengthening its European footprint by establishing Schiebel Aéronaval SAS in Toulon, France.**

The CAMCOPTER® S-100 has been in service with the French Ministry of Armed Forces since 2012. In order to more closely support this successful partnership and meet the operational requirements of the Armed Forces in case of major engagements, Schiebel has established a company in France, situated close to its customer, in Toulon. The new Schiebel entity will provide localised support for the French Navy's fleet of S-100 within the framework of a 5-year contract DMAé (Direction de la Maintenance Aéronautique) awarded to Schiebel at the end of 2023.

Schiebel Aéronaval SAS will house a production and repair facility to conduct the assembly and maintenance of the S-100 systems for the French Navy and other customers. The new Schiebel company will also have a training department to train operators and maintenance technicians.

Furthermore and significantly, the entity is intended to become the main European production and payload integration site for the evolving CAMCOPTER® S-300.

Schiebel Aéronaval SAS embeds itself into the French Aerospace industrial network, works closely with other local French companies and is expected to generate many employment opportunities in the Toulon area.

“We are extremely proud to count France, renowned for its emphasis on strategic autonomy, among the CAMCOPTER® S-100 users. Opening a facility in Toulon not only enables us to serve the French Navy better, but also to be closer to our French industrial partners and benefit from the advantages of the region, including direct access to the sea. We are more than excited about the new opportunities this important step will bring“, said Lubos Sramek, CEO of Schiebel Aéronaval SAS.

### **About Schiebel:**

Founded in 1951 in Vienna, the globally operating Schiebel Group focuses on the development, design and production of the revolutionary CAMCOPTER® S-100 Unmanned Air System (UAS). Certified to meet AS/EN 9100 standards, Schiebel has built an international reputation for producing high-tech military, commercial and humanitarian products, which are backed by exceptional after-sales service and support. Schiebel has facilities in Vienna and Wiener Neustadt (Austria), Toulon (France), Manassas, VA (USA), Abu Dhabi (UAE), and Shoalhaven (Australia).

## **About the CAMCOPTER® S-100:**

Schiebel's CAMCOPTER® S-100 Unmanned Air System (UAS) is an operationally proven capability for military and civilian applications. The Vertical Takeoff and Landing (VTOL) UAS requires no prepared area or supporting equipment to enable launch and recovery. It operates by day and by night, under adverse weather conditions, with a beyond line-of-sight capability out to 200 km / 108 nm, over land and sea. Its carbon fiber and titanium fuselage provides capacity for a wide range of payload/endurance combinations up to a service ceiling of 5,500 m / 18,000 ft. In a typical configuration, the CAMCOPTER® S-100 carries a 34-kg / 75-lbs payload up to 10 hours and is powered with AVGas or JP-5 heavy fuel. High-definition payload imagery is transmitted to the control station in real time. In addition to its standard GPS waypoint or manual navigation, the S-100 can successfully operate in environments where GPS is not available, with missions planned and controlled via a simple point-and-click graphical user interface. The high-tech unmanned helicopter is backed by Schiebel's excellent customer support and training services.
